### **Micro-Current Facial/ Non-Surgical Face Lift Series**

A micro-current facial emits extremely low-voltage electrical currents (hence 'micro' current), which mirror your own body's electrical currents on a cellular level to repair damaged skin and stimulate collagen and elastin production.

It works simultaneously to repair collagen in the dermis, the deepest layer of your skin, while gently erasing signs of aging in the epidermis, the top layer of your skin.

Micro-current facial toning is great if:

- You are concerned about increased wrinkles and signs of aging
- You do not like the idea of injectable cosmetics
- You do not want the downtime and risk of surgery
- You would like a great all-over result of youthful radiance

The Series:

Treatment Recommendations According to Age

20-30 Years Old: As preventative to slow down the aging process

30-40 Years Old: Initial series of 6

50-60 Years Old: Initial series of 6-12

Series 45 min 65.00 per treatment. Series of six and more

Series 45 min 85.00 per treatment. Series of four or less

Choose your series according to age and desired outcome. Your desired outcome is based on the health of your facial muscles.

**Acne Management Facial** Does acne make you feel less confident? I understand, I am passionate about helping you look your best. The best defense is the best offense. Let's stay ahead of your breakouts, find the cause, and help you to a clearer complexion! After a thorough consultation analyzing your skin, diet, and homecare routine, a treatment plan will be discussed. The focus is on treating pore congestion and inflammation, gently and effectively using enzymes and ultra-sonic cleansing. Calming and soothing serums are used in conjunction with Led light therapies to calm redness and inflammation associated with acne. A series of these treatments along with a specific homecare program usually yields significant results within 12 weeks!
